

INDEX OF ARTICLES

ATLANTA ECONOMIC REVIEW

PUBLISHED IN 1972

The index of 1972 articles sums up another year of informative writing. This year saw 129 authors contributing 98 articles from many disciplines in the academic world and a wide variety of professions, an increase of 28 authors over 1971. Articles contributed by corporation executives, government officials, and representatives from such fields as geography, law, architecture, and ecology enabled us to move forward in our effort to improve the quality and content.

The subject index has been revised to include both more, and more meaningful categories in hopes of improving ease of use by the reader and researcher. There are 34 categories shown here. We expect our own editorial analysis and future planning to expand this number. Special issues in September and October proved to be very popular.

We have a good inventory of manuscripts. However, we encourage more contributions from authors, especially in the nonacademic world.

Academic Entrepreneurship: Problems and Prospects
Lawrence M. Lamont April

Accounting and the Decision Sciences
Constantine Konstans and
Elbert Greynolds. November-December

Affiliated Groups in the Southeast
John E. Tully October
